CTD SERIES: UPGRADES THAT THAT DELIVER MORE

The CTD Series is built for those who rely on their trailer every day. Enhanced structure and upgraded protection deliver added confidence on the job, with refined details that elevate everyday use.

BUILD & STRUCTURE

16" O.C. STEEL HAT POST WALL FRAMING

Steel hat posts spaced 16 inches on center increase wall rigidity, reduce flex, and reinforce the overall structure for more demanding use.

ENGINEERED STRUCTURAL PANEL FLOORS & WALLS

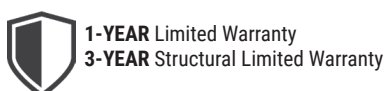

3/4" floor and 3/8" wall panels create a strong, stable structure that resists deformation under repeated use. Engineered for enhanced moisture resistance, these panels deliver more consistent performance than traditional wood products.

SLOPED V-NOSE FRONT PROFILE

Improves towing efficiency and stability while adding up to 18" of usable interior space for more efficient cargo storage and a streamlined, professional appearance.

ENHANCED DIAMOND PLATE TRIM

Provides expanded protection along the front and lower edges, helping defend against road debris and everyday wear while maintaining a clean, finished look over time.

KEY FEATURES

CURBSIDE DOOR WITH RV LOCK + CAM BAR LOCK

Dual-lock system adds security while maintaining smooth, reliable operation. Standard on most sizes, with select compact models offering it as an option.

LED LIGHTING

Bright, efficient LED lights enhance visibility for safer travel and deliver long-lasting performance. Sealed design helps protect against moisture and road debris.

RADIAL TIRES

Provide a smoother ride and more stable towing.
